

A photograph of a worker in a blue hard hat, yellow safety glasses, and a green and black safety harness. The worker is wearing a tan long-sleeved shirt and yellow work gloves. They are working on a complex steel structure, possibly a bridge or a large industrial building. The background is slightly blurred, showing more of the structure and some greenery. The photo is overlaid with a large red triangle on the left side.

The Problem: Are you OSHA ready?

The Martin Safety Solution:

Martin Safety Solutions can help you with any OSHA compliance or laws/standards concerns.

OSHA requires employers to be responsible for providing a safe and healthful workplace.

<https://www.osha.gov>

Eye and face protection must be provided whenever necessary to protect against chemicals, environmental, and radiological hazards or mechanical irritants. Head protection must be provided whenever necessary to protect against a potential for injury to the head from falling objects. Ensuring worker safety includes conducting a workplace hazard assessment and providing the adequate training to make sure everyone goes home safely to their families.

For our extensive list of Custom Tailored Safety Solutions, please refer to page 1 or visit our website at www.martinsafety.com.

3M™ Solus™ 1000 Series Eyewear

Features removable temples, soft nosebridge, optional elastic strap, padded temples for added comfort, and vented, removable foam gasket to help reduce eye exposure. Scotchgard™ Anti-Fog Coating lasts longer than traditional anti-fog coatings, helping to increase eyewear performance in wet and steamy environments. Workers may enjoy reliable, clearer sight longer, because the coating, with its active ingredient, is bonded to the lens. Coating retains its effectiveness for at least 25 washings, allowing workers to wear their eyewear longer. Coating can be disinfected with diluted bleach soaking or alcohol wipes without losing its anti-fog performance. Meets the requirements of ANSI Z87.1 and CSA Z94.3.

Honeywell UVEX Uvex Livewire™ Sealed Eyewear with HydroShield™

Delivers the fit, performance and protection required in extreme environments, protecting workers against intense wind, sun, dirt, dust and debris, as well as high heat and humidity. Optimized design ensures excellent, comfortable fit for almost any wearer. Streamlined, wraparound frame design accommodates respirators and other PPE, while the low-profile temples fit comfortably with earmuffs. Foam-lined subframe is precision engineered to offer maximum comfort and a gap-free seal around the eyes to keep debris out. Padded temples are engineered to provide ideal tension and flex for superior comfort and fit. Ratcheting temples adjust lens angle by up to 15° for optimal coverage and air circulation. HydroShield anti-fog lens coating is permanently-bonded and provides up to 60X longer lasting fog-free performance, even after extended wear and repeated cleanings, and provides 2X greater scratch resistance than our next best coating. Can be worn with a headband like a goggle or with temples like a spectacle. Highly adjustable, flame-resistant cloth headband provides an excellent fit and is latex-free. Meets ANSI Z87.1+ 2015 standard. Certified to the requirements of the CSA Z94.3 2007 standard.

Honeywell UVEX Uvex Tirade™ Sealed Eyewear

Offers protection in high particulate environments where dust, dirt and debris present the risk of eye injury. Features a large unilens design for a wide field of unobstructed peripheral vision, and a soft foam subframe to ensure a comfortable gap-free fit. Indirect ventilation channels on the foam and subframe provide superior dust filtration keeping debris out of the eyes. Quick-release hinge system converts easily from temples to headband. Dependable, cost-effective solution for indoor and outdoor environments requiring sealed eyewear protection. Removable temples and standard adjustable headband included; hypoallergenic latex-free option available. Uvextra® anti-fog coating helps keep lenses clear in humid or extreme environments. 100% Non-conductive dielectric design. Can be worn in environments where accidental exposure to electrical charge is possible. Meets the ANSI Z87.1+ 2015 standard. Certified to the requirements of the CSA Z94.3 2007 standard (with and without foam subframe in place). Not for chemical splash applications.

3M 3M™ Goggle Gear 500 Series

Splash goggle with low-profile design, adjustable strap and optional prescription insert. Polycarbonate lenses absorb 99.9% of UV rays. Scotchgard™ Anti-Fog Coating lasts longer than traditional anti-fog coatings, helping to increase eyewear performance in wet and steamy environments. Workers may enjoy reliable, clearer sight longer, because the coating, with its active ingredient, is bonded to the lens. Coating retains its effectiveness for at least 25 washings, allowing workers to wear their eyewear longer. Coating can be disinfected with diluted bleach soaking or alcohol wipes without losing its anti-fog performance. Meets the requirements of ANSI Z87.1 and CSA Z94.3.

Uvex Stealth® Goggles with HydroShield™

S3960HS

Features lightweight, comfortable, low-profile design, and toric lenses for superior optics and peripheral vision. Unique lens system for quick and simple replacement. HydroShield anti-fog lens coating is permanently-bonded and provides up to 60X longer lasting fog-free performance, even after extended wear and repeated cleanings, and provides 2X greater scratch resistance than our next best coating. Quick-adjust neoprene headband clips permit fast and easy fitting even on hard hats. Meets ANSI Z87.1+ 2015 standard. Certified to the requirements of the CSA Z94.3 2007 standard. Made in USA.

Q: What is the difference between Direct Vented, Indirect Vented and Non-Vented goggles?

A: Choosing a goggle depends on your application needs. Direct Vented Goggles permit a direct air flow from the work environment into the goggle and are designed for situations where impact is the hazard and a splash or vapor hazard does not exist. Indirect Vented Goggles feature a “hooded” or covered vent that allows free air movement but prevents the direct passage of liquid. These goggles are intended for applications that require protection from chemical splash. Non-Vented Goggles have no venting of any kind and prevent the passage of dust, mist, liquid and vapors. A good use for this goggle is in applications where chemical vapor* is the hazard.

*Non-Vented goggles are not gas-proof goggles. When gas-proof goggles are required to be worn, non-vented goggles will not provide adequate protection.

SS100

Pyramex Slip-On Side Shields

Adapt to the shape of a wide range of frames. No tools required to install or remove. Clear. Meets ANSI Z87.1+ High Impact standard.

ITEM #	MARTIN #	DESCRIPTION	UOM	PRICE

SuperEight® High Performance Hats and Caps

Thermoplastic full brim hard hat with unique, smooth crown that eliminates the danger of falling objects being trapped by ribs, ridges, or slots. Adjust head size by using rear-located ratchet mechanism and tilting the headband. Includes 8-point suspension with ratchet adjustment, unless otherwise indicated. Caps are also available in heavy-duty, lightweight fiberglass for optimum impact resistance, durability and crack resistance, and Swingstrap™ suspension that allows the wearer to convert from front to rear wearing positions without reversing the suspension or headband. Model E-1 full brim hats provide extended protection from the sun, nontoxic splash, dust, dirt and debris. Models E-1 and E-2 are SEI certified to meet ANSI Z89.1-2003, Type 1, Class E, G or C.

Series P2A Hard Hats

Proprietary injection-molded fiberglass compound offers exceptional impact and crack resistance and is 8 times stronger than common high density polyethylene (HDPE) cap shells. Best-in-class heat resistance. Meets ANSI-Z89.1-2009 impact resistance tests at extreme temperatures of up to 370°F. Solid color resin provides a permanent, no-chip, no-peel matte finish. Technically-advanced SuperEight® suspension balances and spreads weight over a wide area for added comfort and impact protection. Available with the famous Fibre-Metal® non-slip/non-strip ratchet, SwingStrap™ or TabLok™ headgear. Ready-to-use with the industry's most versatile Speedy® Loop helmet attachment system for faceshields and welding helmets. For added assurance of performance, all Roughneck caps are factory-assembled and SEI third party certified to meet ANSI Z89.1-2009 Type I Class G and CSA Z94.1-2005 Type I Class G in both forward and reverse.

A49 Everest Series Hard Hats

High-density polyethylene (HDPE) outer shell provides protection from harmful UV rays, rain and falling debris. Accessory slots accept face and hearing protection additions for the fullest available protection. Choice of 4-point nylon suspension with pinlock adjustment (model A49) or 6-point nylon suspension with ratchet adjustment (model A49R). Both include forehead comfort band and crown pad. Also features 2-level height adjustment and self centering. Meets ANSI Z89.1-2009 Type 1 Class E and CSA Z94.1-2005 Type 1 Class E.

Turboshield™

Perfect for workers exposed to falling or flying objects, impact, splash and airborne debris; it can also be comfortably worn with most goggles, respirators and earmuffs. Flexible head-cushioning suspension cradle provides 300% greater contact area than traditional suspensions to eliminate pressure points for all-day wear. Simple push-button release system allows for easy visor exchange in seconds. Feel safer with 50% more chin coverage compared to traditional visors, without the need for bulky accessories. Control knobs are large and ergonomically designed for easy adjustment, even while wearing gloves. Visor slides back 7", improving balance and weight distribution. Headgear features breathable, removable, washable headband; toric lens provides excellent optics, increased field of view and added chin coverage without bulky attachments. Clear and Gray lenses available with dual anti-scratch/anti-fog coating for longer visor life and reduced fogging. Ergonomically designed ratcheting headgear mechanism assures quick, easy adjustment to achieve an optimal fit. Hard hat adapter accessory is compatible with multiple hard hats, including Fibre-Metal®, North® and most major competitor styles. Positive-locking hinge secures visor in raised and lowered positions. Integrated brim guard ensures gap-free fit and protection from overhead debris. Meets ANSI Z87.1-2010 and CSA Z94.3 standards. Faceshields offer secondary protection and must be worn with spectacles or goggles.

Bionic® Faceshields

Provides excellent optics, visibility, and enhanced protection from airborne debris. Ideal for workers exposed to falling or flying objects, impact, chemical splash and other debris. Features extended chin and top-of-head protection, lightweight and balanced design to reduce head and neck strain, cell foam on back of headgear, and breathable, washable sweatband up front. Dual position polycarbonate visors are easy to replace and attach securely. Comfortably worn with most goggles, eyewear and respirators. Meets ANSI Z87.1+ High Impact standard. Certified to the requirements of the CSA Z94.3 standard. Made in USA.

F400 and F500 Faceshield Headgear

A variety of faceshield headgear with crown protectors provides the level of protection you need. Both models feature lightweight and heat-resistant Noryl® (the same material used in welding helmets) crown protectors and ratchet headbands (windows sold separately). Meets ANSI Z87.1+ High Impact standard. Certified to the requirements of the CSA Z94.3 standard.

F400 features a 4" crown protector to extend protection without increasing weight. Incorporates wide-vision (8" x 17") wraparound windows and screens which provide 40% more protective area than standard size faceshields. Fits easily over required spectacles or respirators.

F500 includes a broader, deeper 7" crown protector to provide an extra margin of protection when harsh working conditions require it. Features the exclusive Channel Grip System that mounts wide, wraparound windows and locks them into place to form a perfect seal from dust, dirt and debris. Includes Fibre-Metal classic 3-C, free-floating headgear.

ITEM #	MARTIN #	DESCRIPTION	UOM	PRICE
▲ F400	NTHF400	Medium-duty faceshield headgear w/ 4" crown protector	Ea	\$19.42
▲ F500	NTHF500	Heavy-duty faceshield headgear w/ 7" crown protector	Ea	\$23.37

High-Performance® Faceshield Windows and Frames

Easily and comfortably fit over required protective spectacles or respirators. Windows are injection-molded from propionate for superior performance and are preformed to the exact curve of crown protectors for easy installation, an exact fit and a perfect seal against dust, dirt and debris. For an extra margin of protection, windows are .060" thick, and measure 8" x 16 1/2". Choose from clear or green windows, which protect from glare and bright light. (Not suitable for welding protection).

Dual channel mounting system anchors one channel to the hat and the other to the window, allowing users to lock windows into the work position or pivot up and out of the way when not needed. Locked channels prevent debris from getting between the cap and faceshield.

WARNING

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the *User Instructions* provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. **Misuse may result in sickness or death.** For proper use, see packaging instructions, supervisor, or call 3M PSD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.

8233

3M 3M™ Particulate Respirator 8233, N100

Excellent choice for lead abatement, pharmaceutical manufacturing, welding, metal pouring and work involving select OSHA substance-specific particle exposures in concentrations up to 10 x the OSHA PEL, excluding those containing oil aerosols and asbestos. Features 3M™ Cool Flow™ Exhalation Valve, comfortable foam face seal, adjustable straps and lightweight construction. Respirators are individually packaged. NIOSH Approval TC-84A-1298.

8516

3M 3M™ Particulate Respirator 8516, N95, with Nuisance Level* Acid Gas Relief

Designed for the aluminum industry. Helps provide protection against certain non-oil based particles including those present with nuisance levels* of acid gases such as sulfur dioxide, hydrogen fluoride, and/or chlorine. Excellent choice for work settings that involve heat, humidity and long wear periods. Workplace applications include aluminum smelting, pot room environments, glass etching, chemical processing, paper processing, brewing, and for applications in which nuisance level* acid gases are present. Features the 3M™ Cool Flow™ Exhalation Valve and the M-noseclip for greater comfort. Meets NIOSH 42 CFR 84 N95 requirements.

***3M™ recommended for relief against nuisance levels of acid gases. Nuisance level refers to concentrations not exceeding OSHA PEL or applicable government occupational exposure limits, whichever is lower.**

3M

3M™ Rugged Comfort Half Facepiece Reusable Respirators, 6500 Series

Helps provide respiratory protection against airborne contaminants in harsh, dirty environments. Facepiece is designed to help promote comfort, durability and stability with a firm, lightly textured silicone faceseal and strong body construction. Helps provide respiratory protection at concentrations up to 10 x the Permissible Exposure Limit (PEL) when respirator is properly fitted. Sleek, overmolded/low-profile design helps to give a wide field of view that better suits compact work spaces and simplifies cleaning. Resilient silicone faceseal offers an extended facepiece life, even keeping its shape in high-heat environments. Facepiece offers numerous other comfort features including a special valve cover that helps to direct exhaled breath and moisture downward and 3M's proprietary Cool Flow™ Valve that helps to make breathing easier by reducing heat and moisture. Made to fit securely and comfortably on the head, the facepiece comes with an adjustable head harness assembly featuring polyester/spandex straps that stretch and conform. Facepiece is compatible with all 3M™ bayonet-style filters and cartridges to help provide respiratory protection against a variety of gases, vapors and particulate hazards according to NIOSH approvals. The 6500QL Series features a proprietary Quick Latch design offering an easy, one-hand touch drop-down mechanism for putting the facepiece on and/off while moving in and out of contaminated areas. NIOSH/MSHA Approved.

3M 3M™ Replacement Cartridges and Filters

Use with 3M™ Respirators 5000, 6000, 7000 and FF-400 Series, according to NIOSH approvals. When properly selected, cartridges and filters help provide protection from a variety of gases, vapors and particulate hazards.

*Nuisance level organic vapors refer to concentrations less than the OSHA PEL or applicable government occupational exposure limits, whichever is lower. Do not use for respiratory protection against organic vapors.

**Nuisance level acid gases refer to concentrations less than the OSHA PEL or applicable government occupational exposure limits, whichever is lower. Do not use for respiratory protection against acid gases.

***3M™ recommended for ozone protection up to 10 x OSHA PEL or applicable government occupational exposure limits, whichever is lower. Not NIOSH approved for use against ozone.

****OSHA regulations require gas proof goggles be worn with half facepiece respirators when used against formaldehyde.

Only 3M™ filters 2000 Series, 7093, 5N11 or 5P71 are approved for use with 3M™ 5000 Series Respirators. Cartridges on 5000 Series Respirators cannot be replaced. The 3M™ Filter Adapter 502 is required for use of the 2000 Series and 7093 filters with the 5000 Series Respirators and 6000 Series Cartridges. The 3M™ Filter Retainer 501 is required for use of the 5N11 and 5P71 prefilters with the 5000 Series Respirators. The 502 adapter cannot be reused.

3M™ Versaflo™ V-Series Supplied Air* Valves

3M Automotive Aftermarket Division (AAD) product numbers are found in blue type on select products.

3M™ GVP-Series Belt-Mounted Powered Air Purifying Respirators

*Medium/Large size comes with removable blue film covering the visor.

**Clip-on Welding Shield also available.

***V-199 included with breathing tube assembly. Also sold separately.

****3M GVP-100 motor blower, 3M GVP-110 power cord and 3M GVP-111 battery pack combination has been tested and classified by Underwriters Laboratory (UL 913 5th Edition) for intrinsic safety: See User Instructions for additional information.

OV = NIOSH approval: Certain organic vapors.

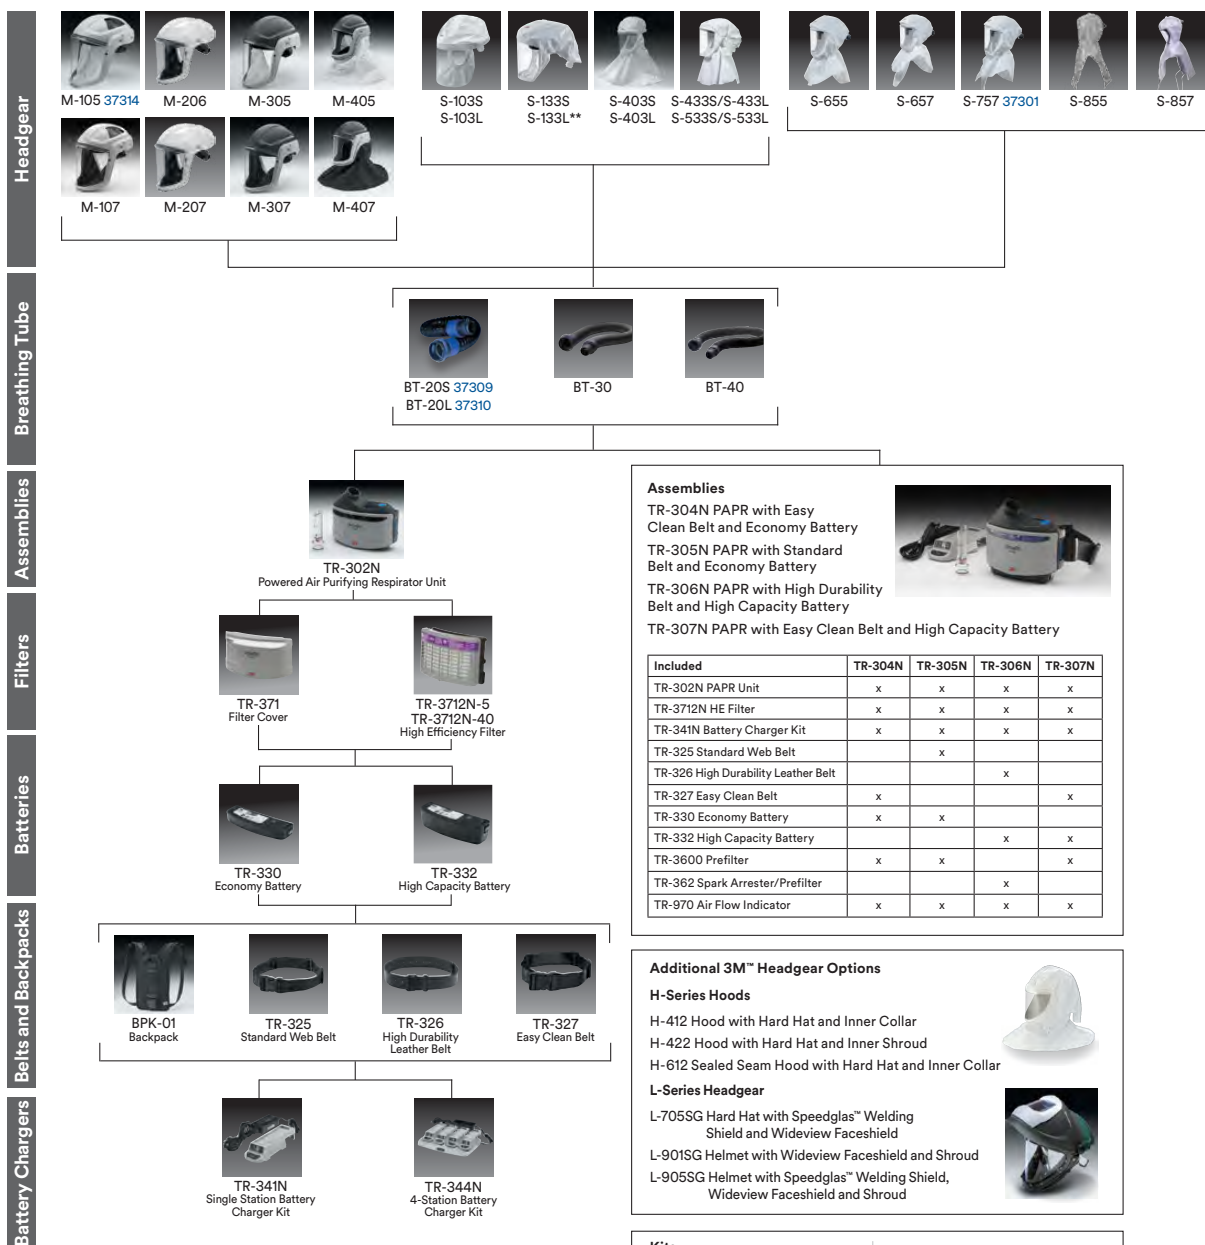

AG¹ = NIOSH approval: Chlorine, hydrogen chloride, sulfur dioxide, chlorine dioxide or hydrogen fluoride.

AG² = NIOSH approval: Chlorine, hydrogen chloride, sulfur dioxide, chlorine dioxide, hydrogen fluoride and hydrogen sulfide.

3M Automotive Aftermarket Division (AAD) product numbers are found in blue type on select products.

PRODUCT MATRIX

3M™ Versaflo™ TR-300 Series Powered Air Purifying Respirators (PAPRS)*

*Operating Altitude approx. sea level to 2,600 ft. (800m). For altitudes above 2,600 ft., contact 3M.

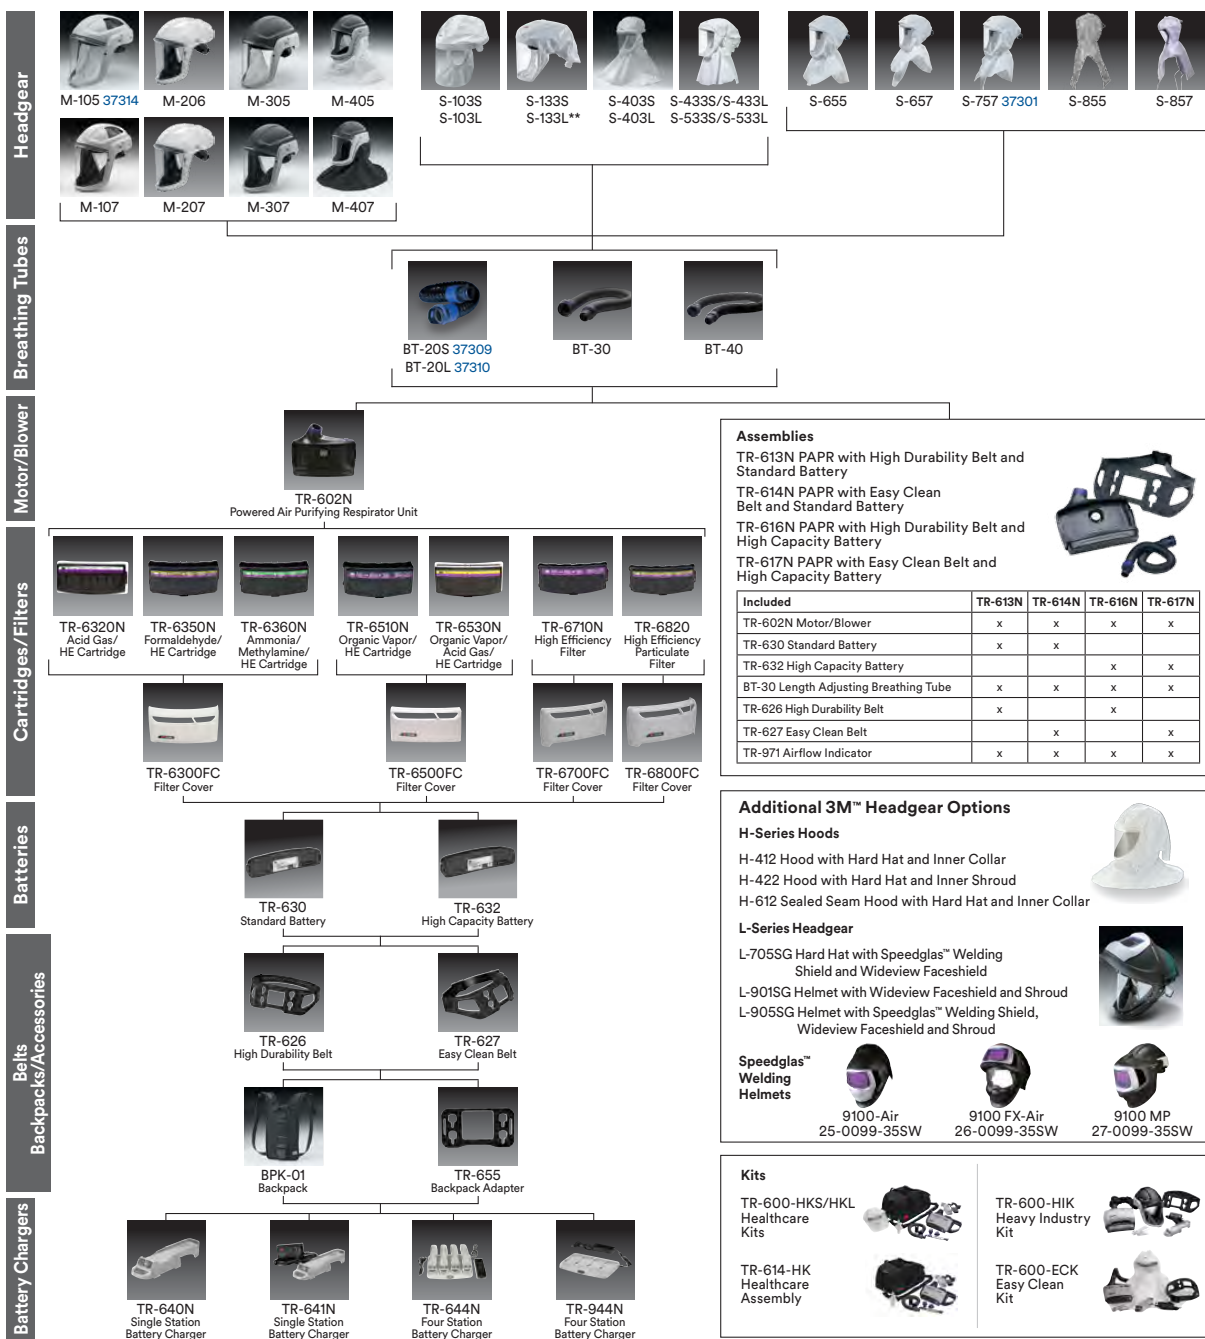

**Medium/Large size comes with removable blue film covering the visor.

3M Automotive Aftermarket Division (AAD) product numbers are found in blue type on select products.

3M™ Versaflo™ TR-600 Series

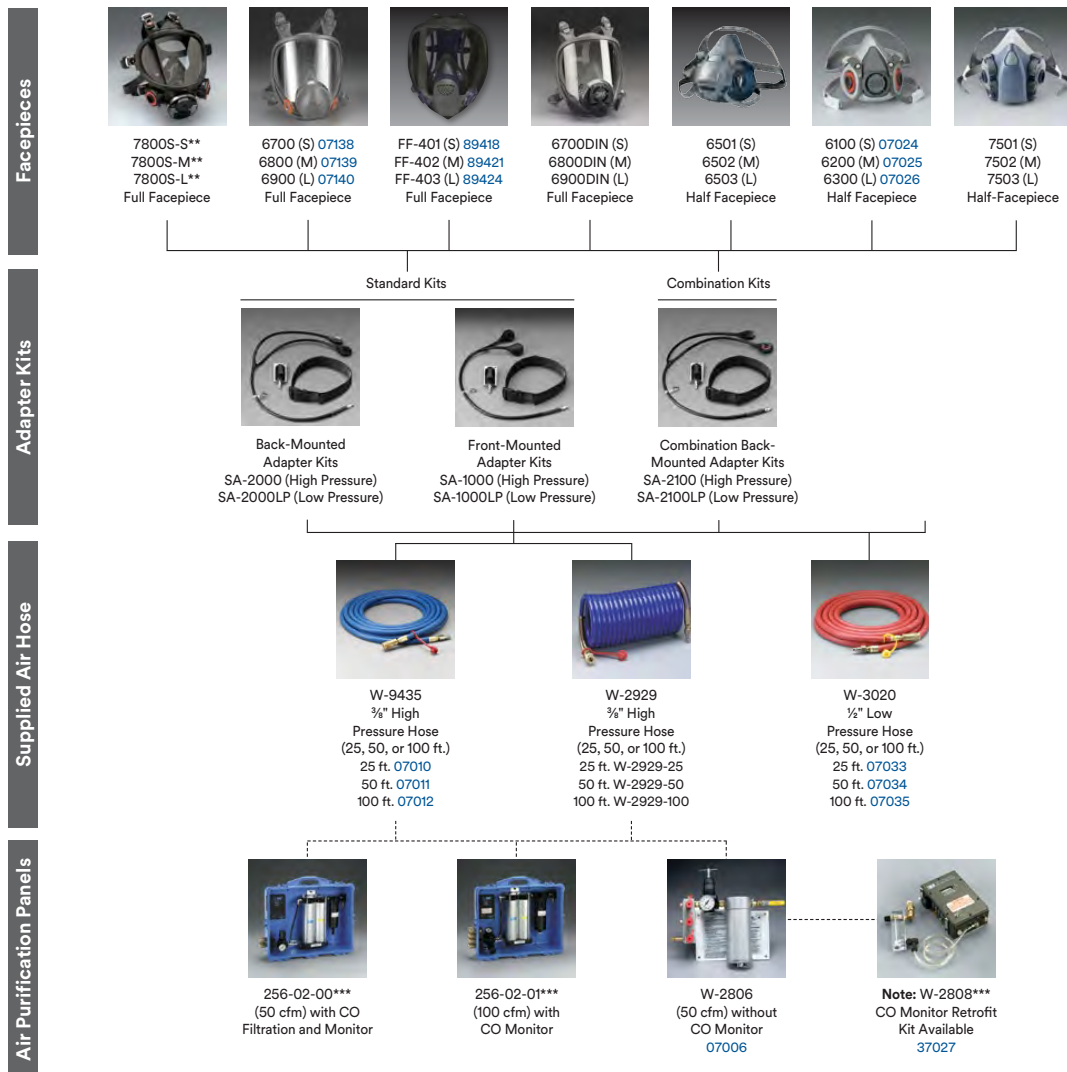

Purifying Respirators (PAPRS)*

*Operating Altitude -328 to 16,404 ft. **Medium/Large size comes with removable blue film covering the visor
3M Automotive Aftermarket Division (AAD) product numbers are found in blue type on select products.

PRODUCT MATRIX

3M™ Supplied Air* Respirators

Note: Headgear, breathing tube, air control valve, and compressed air supply hose are required parts in a NIOSH-approved system. Any NIOSH certification appearing on 3M components is strictly limited to use in an approved air system and only in full accordance with the specifications and limitations under said approval. NIOSH certifies complete assemblies only, not sub-assemblies.

*It is the employer's responsibility to ensure that the compressed air used with any supplied air system meets the requirements for at least Grade-D breathing air per the Compressed Gas Association Commodity Specification G-7.1 in the U.S. as specified in the Occupational Safety and Health (OSHA) Respiratory Protection standard 1910.134(i)(1)(ii). In Canada, refer to CSA Standard Z180.1 table for the quality of compressed breathing air.

**Clip-on 3M™ Welding Shield also available.

***The use of a calibration kit is also required, see part numbers 529-04-48 (Large) or part number 529-04-49 (Small)

			Organic Vapor Monitors	Ethylene Oxide Monitors	Formaldehyde Monitors					

*Nuisance level refers to concentrations not exceeding the OSHA PEL, or applicable government occupational exposure limits, whichever is lower.
 *OSHA regulations require gas proof goggles be worn with half facepiece respirators when used against formaldehyde.
 *3M recommended for use against methylbromide or radiolabel up to 5 ppm with daily cartridge replacement.
 *See User Instructions or visit 3M.com/service/indicator to learn more about the 6000 Series.

WARNING

Respiratory Products
 These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the user instructions provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For proper use, see packaging instructions, user manual, or call 3M PPE Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-263-4434.

3M 3M™ Speedglas™ Fresh-Air III Supplied Air Systems

Supplied air respiratory protection system. Includes Speedglas™ 9100-Air and 9100 FX-Air Welding Helmets with Fresh-Air III Supplied Air System. Available with V-100 Vortex Air-Cooling valve or V-200 Vortemp™ Air-Heating valve.

Features:

- SideWindows - Shade 5 side filters that increase peripheral vision
- Ergonomic, adjustable head suspension for increased comfort, helmet stability and weight distribution
- 3M™ Speedglas™ Auto-Darkening Filter
- Selectable Shades 5, 8-13 and Shade 3 light state; Grinding and Tack modes
- For use with all Stick, MIG, and TIG welding processes
- Five-position sensitivity control
- Adjustable recovery delay
- Meets ANSI Z87.1-2010

Cougar™ SCBA

Silicone facepiece provides comfort and durability, even in extreme heat or cold. Won't oxidize or react with ozone. Provides better sealing ability for improved comfort and fit. Features low-pressure, 30-minute, 2216 psig, bell alarm, aluminum cylinder without locking collar, Twenty20+® facepiece, nose cup and headstrap. Second stage regulator has compact, Air Klic™ fastening system; first-breath-on; better downward vision for less chance of damage; allows attachment in any orientation; regulator holder on waist strap allows regulator to be kept in stand-by mode. Mighty-Light® backpack is light, easy to use, and comfortable; no tools required for quick, easy disassembly and assembly.

PUMA™ SCBA

Rated for entry into immediately dangerous to life or health (IDLH) environments. No need for spectacles kits. Hood is made from Challenge® NXT barrier fabric (fluoropolymer films laminated to aramid substrates) for excellent permeation resistance. Lens is made from 10 mil FEP Teflon®. Flexible neoprene neck seal provides excellent protection against contaminants in IDLH atmospheres. Features hood with factory-installed medium silicone nose cup; plain whistle alarm, 2216 psig 30-minute aluminum cylinder without locking collar.

CA200 Series PAPR

Triple alarm system creates an audible, vibratory and visual alarm to warn workers of battery life and/or filter clog. Vibratory alarm can be felt even through welding jackets; warns workers who are hearing impaired or in high noise environments. Two visual alarms: one for low battery and another one for a clogged filter. Lightweight for improved comfort and longer wear. Same unit can be used for either tight facepieces or loose fitting hoods to accommodate different needs and preferences. Airflow is automatically adjusted to meet OSHA and CSA CFM requirements. Complete assembly includes:

- (1) Blower
- (1) Lithium-ion battery
- (1) Flow meter
- (1) Single unit battery charge
- (1) Carry case

* Filters/cartridges sold separately

N-Series Cartridges, Filters and Cartridge/Filter Combinations

Air-purifying respirators with cartridges provide respiratory protection against gases and vapors by using sorbents to purify the inhaled air. N-Series filter/cartridge combinations also remove dusts, fibers and other particles. All Honeywell North N-Series cartridges and filters are NIOSH approved with select Honeywell North air-purifying half masks and full facepiece respirators. N750036 assembly for filters, includes: (2) N750027 covers and (2) N750038 filter supports to attach filter pads to gas and vapor cartridges.

⚠ WARNING

These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury.** For proper use, see supervisor, *User Instructions*, or call 3M in U.S.A. at 1-800-243-4630. In Canada, call Technical Service at 1-800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing ear plugs. Failure to do so may result in hearing loss or injury.

* NRR is the Noise Reduction Rating in decibels (dB). It is the average noise reduction obtained by a group of people wearing a specific hearing protector in a laboratory test. Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit and wearing time. It is recommended that the NRR be reduced by 50% for estimating the average amount of noise reduction provided.

⚠ WARNING

These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times that you are exposed to noise may result in hearing loss or injury.** For proper use, see supervisor, *User Instructions*, or call 3M in U.S.A. at 1-800-243-4630. In Canada, call Technical Service at 1-800-267-4414. If there is any drainage from your ear or you have an ear infection, consult with your physician before wearing ear plugs. Failure to do so may result in hearing loss or injury.

* NRR is the Noise Reduction Rating in decibels (dB). It is the average noise reduction obtained by a group of people wearing a specific hearing protector in a laboratory test. Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in earplug fit and wearing time. It is recommended that the NRR be reduced by 50% for estimating the average amount of noise reduction provided.

The Problem:

Are you OSHA ready?

The Martin Safety Solution:

Martin Safety Solutions can help you with any OSHA compliance or laws/standards concerns.

OSHA requires employers to be responsible for providing a safe and healthful workplace.

<https://www.osha.gov>

Hand protection must be provided whenever necessary to protect against employees' hands that are exposed to hazards such as those from skin absorption of harmful substances; severe cuts or lacerations; severe abrasions; punctures; chemical burns; thermal burns; and harmful temperature extremes. Ensuring worker safety includes conducting a workplace hazard assessment and providing the adequate training to make sure everyone goes home safely to their families.

For our extensive list of Custom Tailored Safety Solutions, please refer to page 1 or visit our website at www.martinsafety.com.

MSATP

Economy Top-Grain Goatskin Drivers Gloves

Goatskin is softer, has greater tactile sensitivity and outwears other leathers of the same weight. Natural lanolin soothes hands. Provides excellent abrasion resistance. Features keystone thumb. Ideal for use where all-leather gloves are desired, extended wear is expected and superior worker satisfaction is demanded.

100% Nylon Seamless Knit Gloves

Seamless construction provides comfort and reduces hand fatigue. Low lint gloves knit from nylon filament yarns. Fingerless styles provide excellent dexterity. Nylon yarns absorb perspiration and leave hands cool and comfortable. Color-coded hems for easy size identification. Liners can be worn under disposable and other liquid-proof gloves. Ideal for product handling, finishing and assembly, electronics assembly, photography labs and computer manufacturing.

The Problem:

Are you OSHA ready?

The Martin Safety Solution:

Martin Safety Solutions can help you with any OSHA compliance or laws/standards concerns.

OSHA requires employers to be responsible for providing a safe and healthful workplace.

<https://www.osha.gov>

Protective Clothing must be provided whenever necessary to protect against chemicals, environmental, and radiological hazards or mechanical irritants. Ensuring worker safety includes conducting a workplace hazard assessment and providing the adequate training to make sure everyone goes home safely to their families.

For our extensive list of Custom Tailored Safety Solutions, please refer to page 1 or visit our website at www.martinsafety.com.

The Problem:

Are you OSHA ready?

The Martin Safety Solution:

Martin Safety Solutions can help you with any OSHA compliance or laws/standards concerns.

OSHA requires employers to be responsible for providing a safe and healthful workplace.

<https://www.osha.gov>

Fall protection must be provided whenever necessary to protect against any risk that exists where a worker may fall. As a general rule, the fall arrest system should be used anytime a working height of six feet or more is reached. Ensuring worker safety includes conducting a workplace hazard assessment and providing the adequate training to make sure everyone goes home safely to their families.

For our extensive list of Custom Tailored Safety Solutions, please refer to page 1 or visit our website at www.martinsafety.com.

ExoFit NEX™ Construction Style Harness

Full-body harness provides comfort and function with soft, yet extremely durable, anti-absorbent webbing, strategically placed padding and protective elements that prolong service life of harness. Chest platform places labels and i-Safe™ RFID tag behind a Velcro® cover to protect labels and provide easy access. Covered pocket with elastic sides is conveniently placed on front of chest strap to hold workplace or personal items such as a cellular phone. Includes reflective material that increases worker safety in low-visibility environments, stand-up dorsal D-ring, side D-rings, integrated suspension trauma straps for post fall-arrest comfort, sewn-in hip pad and removable body belt, impact indicator stitches and breakaway lanyard keepers. Capacity: 420 lbs. Meets all applicable OSHA regulations and ANSI Z359.11 standard.

Features:

- Duo-Lok™ quick-connect buckles: lightweight, one-hand use with memory-fit
- Revolver™ vertical torso adjusters: simple, fast adjustment that locks into position
- Hybrid comfort padding: combines premium comfort with durability
- Tech-Lite™ aluminum D-rings: lightweight alloy for added comfort
- Repel™ technology webbing: provides up to 5 times more abrasion resistance and water repellency

WARNING

Compliant fall protection and emergency rescue systems help prevent serious injury during fall arrest. Users must read and understand the *User Instructions* provided with the product and be properly trained by their employer prior to use per OSHA 1910.66 and 1926.503 or applicable local standards. **Misuse or failure to follow warnings and instructions may result in serious personal injury or death.** For proper use, see supervisor, *User Instructions*, or call Technical Service at 1-800-560-1094.

Delta™ Vest Style Harnesses

Patented No-Tangle triangular design allows harness to fall into place for quick and easy donning and holds its basic shape so shoulder straps don't rub against neck. Water-repellent Repel™ webbing has built-in rip-stitch impact indicators for inspection of harness for prior damaging impact loads. Revolver™ vertical torso adjuster makes adjustments simple and fast, eliminating loose ends and locking into place to prevent slippage. Includes tongue-buckle leg straps and incorporates a spring-loaded, stand-up dorsal D-ring for fast, easy and safe connections. Tech-Lite™ aluminum alloy buckles reduce both carried weight and energy required for all-day job performance. Features lanyard keepers for holding unused snap hooks and reducing trip hazards. i-Safe™ enabled with RFID technology; label protector has Velcro® cover for holding harness labels and i-Safe identification tag. Capacity: 420 lbs. Meets or exceeds all applicable OSHA regulations and ANSI standards, including ANSI Z359.11.

Miller Twin Turbo™ Fall Protection Systems with G2™ Connector

Twin Turbo™ G2 Connector provides 100% tie-off for the Miller TurboLite™ and Miller Turbo T-BAK™ Personal Fall Limiters (PFLs). G2 Connector provides an alternative to double-leg lanyards - reduces fall clearance requirements for use in more applications. Connects to harness webbing below the D-ring and frees harness D-ring for rescue and connection to an overhead self-retracting lifeline (SRL). PFLs swivel independently for increased worker mobility and prevent webbing from twisting and binding in the unit. Lightweight twin connector increases productivity by reducing worker fatigue. Corrosion-resistant aluminum connector with high-impact nylon result in a longer product life. Webbing Retainer Clip rotates freely to prevent unintentional opening of carabiner gate during a fall; accommodates thicker webbing designs for more versatility and allows for easy insertion of webbing. D-Pad Clip maintains harness adjustment while working by keeping the harness webbing and D-Pad in place. Twin Turbo G2 Connector meets all applicable OSHA, ANSI and CSA requirements. Connectors rated at 3,600 lbs.

3M S&A Nano-Lok™ Edge Self-Retracting Lifeline

Specifically designed for foot level tie-off, when anchoring at the user's feet is the only option. Ergonomically designed for comfort. Limits average arresting forces to 900 lbs. or less. Requires fall clearances as low as 16'. Integrated, backpack-style energy absorber works with connector to limit forces to protect against sharp edges. Backpack design stays tight to harness and evenly disperses unit's weight. Easy-to-install, direct-to-harness connector provides 360° of rotation, seamless integration of the energy absorber, and leaves the D-ring open for rescue or other equipment. Global sharp edge icon for quick identification of sharp edge product. Tough, flexible, lifeline: 3/16" galvanized cable provides maximum range of motion, durability and cut resistance. Impact-resistant, lightweight thermoplastic housing provides maximum durability. Bright orange color for easy identification. Meets applicable standards, including ANSI Z359.14.

Fixed Beam Anchor

Specifically designed for fall arrest anchorage, but can also be used as end point for some horizontal lifeline systems. Installs quickly to beam structure, tightens using built-in adjustment handle. Attaches to beam structure in any orientation or direction for added versatility. Fits flanges 1 1/2" thick and 2 1/2" to 12" wide. Rated 5,000 lbs. minimum strength in any direction. Meets or exceeds all applicable OSHA regulations and ANSI standards, including ANSI Z359.1.

Glyder2TM Sliding Beam Anchorage System

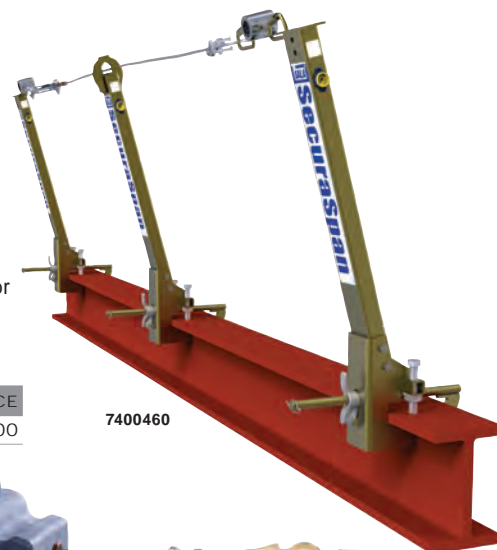

Provides complete horizontal mobility and can be tied-off overhead or at feet (use with Force2TM shock-absorbing lanyard when used at feet). Anchor effortlessly slides across beam on replaceable wear pads, eliminating metal-to-metal contact. Stainless steel construction for corrosion resistance and strength (5,000-lb. min. tensile strength). Channel lock prevents beam grip ends from rotating for hassle-free connection. Positive spring-loaded engagement provides precision adjustment. Dual-beam grip adjustment prevents twisting and turning as it moves along beam. Requires no pins and weighs 3.7 lbs. Fits 3 1/2" to 14" wide flange up to 1 1/4" thick. Meets or exceeds all applicable OSHA regulations and ANSI standards, including ANSI Z359.1.

SecuraSpan™ Horizontal Lifeline System

Economical and safe solution to non-engineered, hand-crafted HLL systems. System comes with everything required and can be installed with no special tools or equipment. Complete with (2) stanchions with built-in fastening system, Zorbit™ energy absorber with turnbuckle and specified cable length with fastening hardware. With optional "bypass" bracket, the system can be configured to run indefinitely. SecuraSpan stanchion fits beam flange widths 6" to 12" wide and up to 2 1/4" thick. Stanchions can be purchased to fit 18", 24" and 36" wide flanges and up to 3 3/8" thick. Installation is simple, fast and efficient with a single clamp anchor on stanchion base. System can be expanded to longer lengths. Meets or exceeds all applicable OSHA regulations and ANSI standards.

EZ-Line™ Retractable Horizontal Lifeline System

Innovative retractable design allows for quick and efficient set-up and disassembly of any length system. Retractable lifeline is simply pulled out for installation and retracted with built-in winch for dismantle. Entire 60' system is retracted into easy-to-carry case which eliminates large, bulky coils of cable. Weighs 25 lbs. Built-in pre-tension and impact indicators take guess work out of set-up and inspection. Provides hands-free horizontal mobility and continuous protection for (2) users per span, up to (6) users per system. Stanchions not included.

Suspension Trauma Safety Straps

Allows suspended worker to stand up in harness relieving pressure on arteries and veins around top of legs. Continuous loop design allows both sides of harness to relieve pressure. Strap provides increased comfort and improved circulation to one or both feet at a time while suspended. Safety accessories can be attached to most harness brands/styles right in the field. Installation is fast and efficient - just choke off to strap. Stows easily and stays out of worker's way. To deploy, simply unzip, hook straps together and step into. Sold as set of 2. Harness not included.

WARNING

Compliant fall protection and emergency rescue systems help prevent serious injury during fall arrest. Users must read and understand the *User Instructions* provided with the product and be properly trained by their employer prior to use per OSHA 1910.66 and 1926.503 or applicable local standards. **Misuse or failure to follow warnings and instructions may result in serious personal injury or death.** For proper use, see supervisor, *User Instructions*, or call Technical Service at 1-800-560-1094.

Miller Relief Step™ Safety Device

Short-term solution alleviates effects of suspension trauma. When a fall occurs, the worker becomes suspended in harness, remaining vertical and sedentary for a long period of time. This causes blood to pool in leg veins, restricts flow to the brain and other major organs and may cause unconsciousness. Device attaches to any brand full-body harness. By utilizing one for each leg/foot, the worker is more comfortable until rescue is completed.

ToxiRAE Pro Single-Gas Monitors for Toxic Gases and Oxygen, Model PGM-1860

A wireless personal single-gas monitor capable of 5-way local and remote alarm notification.

Rugged, intrinsically safe instruments feature three months of continuous datalogging, the largest display in their class, user-replaceable intelligent sensor, rechargeable battery and an automatic calibration option with AutoRAE 2.

Unit includes:

- ToxiRAE Pro monitor with sensor, alligator clip, protective rubber boot, and rechargeable battery installed
- Charging and PC communication cradle
- PC communication cable
- AC adapter (100-240 VAC, 50/60 Hz AC to 12 VDC)
- Calibration adapters
- CD with documentation
- ProRAE Studio II software for PC-based instrument configuration and data management
- Quick Start Guide

MicroRAE™ Multi-Gas Monitor

Wireless multi-gas diffusion monitor simultaneously measures up to four gases, including hydrogen sulfide, carbon monoxide, oxygen and combustibles (LEL). With its multiple wireless connectivity options the MicroRAE can deliver real-time instrument readings, location, and alarm status to other wireless solutions such as ConneXt Plus, ConneXt Pro, ConneXt Loneworker and Safety Communicator.

Features:

- Honeywell ConneXt compatible with Mesh and Wi-Fi wireless configurations
- Real-time gas concentration reading, location, alarm and status enabled by state-of-the-art wireless technology
- Bluetooth® low energy connection to a Smart Phone device for uplink data communication and device configuration
- Compact and lightweight design
- IP-67 water- and dust-resistant case
- Strong, protective, concussion-proof design
- Unmistakable 5-way local and remote wireless notification of alarm conditions
- Short bump test and calibration time
- Filtered LEL sensor options to inhibit sensor poisoning
- Global approval for worldwide acceptance

ToxiRAE 3 Single-Gas Monitors and Accessories

Full-featured single-gas monitor with intuitive, simple-to-operate user interface, large, easy-to-read display. The detector is maintenance-free with user-replaceable 2/3 AA high-capacity lithium batteries and warranted for two years. Unit includes calibration adapter, alligator clip and instructions.

Key features include:

- High-performance 3-electrode pinless micro sensor
- 0-100 ppm H2S
- CO available: high-range 0-1999 ppm, low-range 0-500 ppm
- Event logging up to 10 events
- Full activity records when used with AutoRAE Lite bump and calibration station
- IP67 water- and dust-resistant
- Loud, 95 dB audible alarm, bright red flashing visible LEDs and internal vibration alarm
- Color-coded labels for gas type
- Extended operating temperature range of -4° F to 140° F (-20° C to +60° C) with full T4 approval
- User-configurable bump/calibration reminders
- STEL, TWA, low and high alarms recorded

Honeywell

MiniRAE 3000 Portable VOC Monitors

Handheld volatile organic compound (VOC) monitor features a Photoionization Detector's (PID) extended range of 0 to 15,000 ppm, making it an ideal instrument for applications from industrial hygiene to leak and hazmat detection. The RF modem allows real-time data transmissions with a base controller located up to 500' (or two-miles with optional RAELink2 portable modem) away from the MiniRAE 3000 detector. A PC can be used as the base station for a Mini-RAE 3000 system. The standard ProRAE remote software is capable of monitoring the input of up to (64) remotely-located monitors.

- Accessory kit includes: hard transport case with pre-cut foam padding, charging/download cradle, (5) porous metal filters and O-rings, organic vapor zeroing kit, gas outlet port adapter and tubing.
- Calibration kit includes: 100 ppm isobutylene calibration gas, 34 L and calibration regulator and flow controller.

Honeywell

UltraRAE 3000

Photoionization Detector (PID) with extended range of 0.05 to 10000 ppm in VOC mode and 50 ppb to 200 ppm in benzene-specific mode makes it an ideal instrument for applications from entry pre-screening during refinery and plant maintenance to hazardous material response, marine spill response and refinery down-stream monitoring.

Monitor only includes :

- UltraRAE 3000 monitor, Model PGM-7360
- Wireless communication in built, as specified
- Datalogging with ProRAE studio
- Travel download charger
- RAE UV 9.8 eV lamp with RAE-Sep™ tubes for Benzene
- Flex-I-Probe and short probe
- External filter
- Red rubber boot
- Alkaline battery adapter
- Lamp cleaning and tool kit

- Li-ion battery with universal AC/DC adapter and international plug kit, if specified
- Resources CD-ROM and maintenance manual
- Soft leather carrying case

Accessory kit includes:

- Hard case with pre-cut foam
- Charging/download cradle
- (5) Porous metal filters and O-rings
- Organic vapor zeroing kit

Calibration kit includes:

- Calibration gas, 34 L, as specified
- Calibration regulator and flow controller

ppbRAE 3000 Portable VOC Monitors

Advanced handheld volatile organic compound (VOC) monitor incorporates a Photoionization Detector (PID) with extended range of 1 ppb to 10,000 ppm making it an ideal instrument for applications from hazmat and homeland security, industrial hygiene, to indoor air quality and military applications. The RF modem allows real-time data transmissions with a base controller located up to 500' (or 2 miles with optional RAELink2 portable modem) away from the ppbRAE 3000 detector. A personal computer can be used as the base station for a ppbRAE 3000 system. The standard ProRAE remote software is capable of monitoring the input of up to 64 remotely located monitors like AreaRAE, etc. Monitor with accessories kit includes hard transport case with pre-cut foam padding, charging/download cradle, 5 porous metal filters and O-rings, organic vapor zeroing kit, gas outlet port adapter and tubing. Optional calibration kit adds 10 ppm isobutylene calibration gas, 34 L, calibration regulator and flow controller.

Honeywell**MultiRAE Lite Monitors**

Optimal one-to-six-gas monitor for personal protection and multi-gas leak detection applications. Available in pumped and diffusion versions with a broad selection of sensor options. Configurable to meet the needs and compliance requirements of various countries, industries and applications.

Features:

- Unmistakable 5-way local and remote wireless notification of alarm conditions, including Man-Down Alarm
- 25+ Interchangeable intelligent sensors, including PID for VOCs, NDIR and catalytic LEL for combustibles, and NDIR for CO₂
- Large graphical display with easy-to-use, icon-driven user interface and automatic "flip" feature
- Continuous datalogging (6 months for 5 sensors, 24x7)
- Easy maintenance with replaceable sensors, pump, and plug-and-play lithium-ion battery

**Honeywell****MultiRAE Pro Monitors**

The industry's first wireless multi-threat detection tool that combines continuous monitoring capabilities for gamma radiation, volatile organic compounds, toxic, combustible gases, and oxygen. The MultiRAE Pro combines Man Down Alarm with real-time wireless data communication in a highly portable, MIL-STD-810G-compliant instrument.

Features:

- Unmistakable 5-way local and remote wireless alarm notification, including Man Down Alarm
- 25 Interchangeable sensor options, including parts-per-billion PID and gamma radiation
- Extensive on-board gas libraries (190 VOCs and 55 combustible gases)
- Large graphical display with easy-to-use, icon-driven user interface and automatic "flip" feature
- Continuous datalogging (6 months for 5 sensors, 24x7)

**Honeywell****MultiRAE Benzene Gas Monitor**

Wireless portable multi-gas monitor with Benzene-specific measurement. Wireless access to real-time instrument readings and alarm status from any location. Unmistakable five-way local and remote wireless notification of alarm conditions, including Man Down Alarm. Monochrome graphical LCD display (128 x 160) with backlighting. Intelligent sensors store calibration data, so they can be swapped in the field. Continuous datalogging (up to 6 months for 5 sensors) and snapshot data logging capabilities. Built-in sampling pump. Data download, instrument set-up and upgrades on PC via desktop charging and PC communications cradle, travel charger, or AutoRAE 2 Automatic Test and Calibration System. Wireless data and alarm status transmission via built-in RF modem (optional). IP-65 ingress protection rating. Fully automatic bump testing and calibration with AutoRAE 2. Hazardous Location Approvals: CSA: Class I, Division 1, Groups A, B, C and D, T4; Class II, Division 1; Groups E, F, G; T85°C. MULTIRAE BENZENE
GAS MONITOR

QRAE 3 MULTI-GAS MONITOR

Honeywell**QRAE 3 Multi-Gas Monitors**

Versatile, rugged, multi-sensor gas monitor that provides continuous exposure monitoring of combustibles and toxic gases, including hydrogen sulfide (H₂S), sulfur dioxide (SO₂), carbon monoxide (CO), hydrogen cyanide (HCN) and oxygen (O₂). Unit is certified for use in hazardous environments where exposure to toxic gas is a constant safety threat. Wireless communication capability enables access to real-time, remote instrument readings and alarm status, including an innovative Man Down Alarm. Large graphical display, icon-driven user interface through intuitive, 2-button operation.

- Extensive onboard gas library (dedicated 55 LEL correction factors)
- Easy maintenance with user-replaceable sensors, pump, and battery
- Fully-automated bump testing and calibration with AutoRAE 2
- IP Rating: pumped: IP-65, diffusion: IP-67
- Datalogging: Up to three months (4 sensors at 1-minute interval, 24/7), user-configurable
- LOW, HIGH, STEL (toxic) and TWA (toxic) alarms, user-configurable
- Alarms: bright visual alarm, 95dB audible alarm, vibration alarm
- Certifications: CSA Class I, Division 1, Groups A, B, C and D

Honeywell**AutoRAE Lite Automated Bump and Calibration System**

High-speed station bump test in 12 seconds and full calibration in 2 minutes. Operates on a low-pressure system with a built-in pump and demand-flow regulator that eliminates accidental leaks. Tamper-proof data files store data on a standard SD card, in a text file that can be opened by any spreadsheet software or text editor. Features "No gas flow" alarm. System comes complete with AutoRAE Lite as specified, USB cable for PC set up, universal power supply, demand-flow regulator (installed), SD memory card 512 MB, quick-start guide, inlet filter, diffusion adapter and CD that includes operation manual, drivers and utility software.

ProRAE Guardian Mobile Command Center

Represents an advanced generation of real-time wireless gas detection software and serves as a mobile command center for threat-detection needs. Allows incident commanders and safety managers to get constantly updated, real-time data anywhere and anytime. Software connects, integrates and relays data from RAE Systems' and select partners' wireless products to remote monitors. Accepts real-time detector data and instantly displays device status, alarm and sensor reading information, integrating all information on a single, dynamic map display. Monitors installation from anywhere in the world. Geographically dispersed teams can coordinate threat responses while simultaneously viewing the same situational data, all in real-time.

Features:

- Lower deployment costs
- Increased situational awareness
- 24/7 documentation of exposure conditions
- Early warning and tracking of hazardous threats
- Ideal for rapid deployment situations
- Real-time display of device status, sensor readings, and alarms
- Redesigned user interface with simultaneous on-screen instrument readings
- Integrated Google™ Maps show precise instrument locations with alarm status
- Remote alarming via email and text messages
- Datalogging in text and graphical formats, including boolean filters
- Open platform for third-party devices and systems
- Image overlay option

RAELink 3 Wireless Modem

License-free, ISM band RF transmission with communication range up to 500' with optional RAELink 3 modem. RAELink 3 modem provides GPS capability to track and display readings from remote detectors and provide long-distance transmission. The unit is also a compatible wireless upgrade package for MiniRAE 2000, ppbRAE Plus and MultiRAE Plus detectors. It allows real-time monitoring information from these detector to be integrated into an existing AreaRAE system. This modem transmits readings and other information on a real-time basis to a remotely located AreaRAE base controller.

ConneXt Pack Confined Space Entry Kits

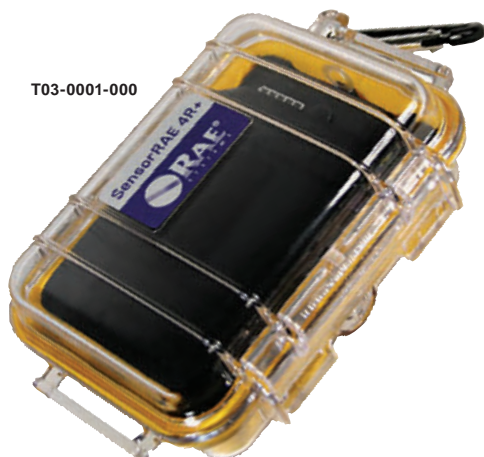

ConneXt Packs are a rapidly deployable confined space entry gas detection solution. Kits include 1-3 pumped or diffused gas monitors with sensing capabilities of CO, H₂S, O₂, LEL, a wireless host, and various accessories. The operation is simple, remove the devices from the case, press the on button, and the worker is ready to enter a confined space while the attendant is able to view toxic gas levels in real time from the wireless host, ensuring the confined space entrants are safe.

SensorRAE 4R+ Portable Sensor Conditioning Station

Compact, waterproof SensorRAE 4R+ sensor conditioning station keeps up to (6) extra sensors warmed up and ready for quick deployment in MultiRAE or ToxiRAE Pro monitors. SensorRAE 4R+ keeps spare sensors on bias and readily available for use without the extra warm-up time after installation required by sensors such as ethylene oxide or nitric oxide. Intelligently applies bias to those sensors that need it and communicates sensor readiness status and battery levels with LED lights. Also provides a convenient way to protect, carry, and store spare sensors.

Features:

- Holds up to (6) 4R+ sensors at a time
- Delivers 6 months of uninterrupted runtime on (4) standard AAA batteries
- Simple to use- just plug in the sensors
- Clearly communicates sensor readiness status and battery levels with LED lights
- Supports MultiRAE, MultiRAE Lite, MultiRAE Pro, ToxiRAE Pro

GAS CYLINDERS

Dräger X-dock® 5300 Test and Calibration Stations

X-DOCK® 5300 TEST
AND CALIBRATION STATION

Provides automatic bump tests, calibration, reduced test gas consumption, short testing times and comprehensive documentation. Comes in multiple configurations to allow for flexibility depending on the type of detection instrumentation being used. Includes a master controller with a module for a single gas detection instrument in the X-am 1/2/5000 or PacM1 family of products.

Features:

- Touchscreen operation at the master controller station
- Up to 3 configurable test routines
- Automatic permeability tests
- Automatic tests of all alarm elements (acoustic, visual and vibration alarms)
- Optional charging function for X-am 1/2/5x00
- Easy to replace seal cartridge
- 12 V operation (e.g., in vehicles) available
- Sensor performance testing

Dräger Rental Robot

Facilitates compliance by providing fully compliant, around-the-clock supply and return of safety equipment. The Rental Robot is a system of secure lockers from which authorized users can check out fully charged and calibrated equipment. This innovative system automates material logistics for safety equipment and can help achieve compliance. Available in different sizes with variable module and compartment configurations to suit your specific requirements. Small gas detectors are stored as efficiently as large breathing apparatus, and the Rental Robot can be fully stocked with Dräger products or left empty to be filled on-site.

System ensures that only authorized employees can access the safety equipment. Access to each compartment is defined individually based on the user's job responsibilities, level of training, fit testing results or other pre-determined qualifications. If a device needs to be serviced or if it has been marked as defective, it can no longer be accessed.

An intuitive check out/check in interface records and documents all releases and returns, and it can tell which employee used which instrument and for how long. If a device has been damaged during operation, the user reports it as defective at the terminal. This helps ensure that it is always known which devices are in use and the condition they are in. Rental Robot also helps to reduce the amount of safety equipment and material damaged or lost during operation.

Hog Heaven™ Anti-Fatigue Matting

Constructed of solid nitrile rubber surface with closed-cell nitrile/PVC cushion backing. Offers chemical resistance along with textured surface for superior slip resistance. Available in two thicknesses 5/8" and 7/8". Borders are available in black or OSHA approved striped borders. Welding safe and electrically conductive. Flexible rubber borders will not crack or tear. Contains 16.5% recycled rubber content. Ideal for work stations, assembly lines, shipping lines and other areas where workers stand for extended periods. Certified slip-resistant by the National Floor Safety Institute.

Hog Heaven™ II Modular Tiles

Provides outstanding anti-fatigue qualities with 3/4" thickness for dry areas. Solid 20% recycled nitrile rubber top surface for excellent chemical and oil resistance. Closed cell nitrile cushion provides long-lasting comfort. Molded cushion backing (not glued) so surface will not delaminate. Remains flexible; will not curl or crack. Linkable beveled border system available in black or yellow. Ideal for distribution, manufacturing, work stations and check-out stations. Welding safe, electrically conductive and certified slip-resistant by the National Floor Safety Institute.

**WEARWELL****SMART Diamond-Plate #497**

Anti-fatigue mats are designed to provide comfort and increase productivity of standing workers. Reduces the level of overall fatigue, decrease isolated lower body aches and pains, and absorbs the shock of walking on hard surfaces. An economical and "green" solution. Abrasion-resistant Diamond-Plate surface is bonded to 100% recycled urethane composite sponge base. Comfortable and functional in dry industrial applications. Available in UltraSoft 1" thickness. Lasts five times longer than traditional sponge mats. Made from 80% recycled content.

ERGODECK OPEN GRID

ErgoDeck® Open Grid #560 and SOFT Open Grid #564

For use in wet and non-greasy areas or in dry environments where small debris can drop through matting system. System of 7/8" thick, super-sized ergonomic tiles, ramps and corners. Quickly and easily covers large areas and requires less time and labor to install. Features LockSafe®, a patented and totally effective, interlocking system that quickly "locks" tiles together, and keeps them together despite constant use. Heavy-duty #560 provides flexibility underfoot and reduces fatigue, yet also withstands cart traffic and heavy usage. Tiles can endure up to 64 psi, the equivalent of a 300 lb. cart with 4" diameter wheels. #564 is a softer compound underfoot and is ideal for light cart traffic.

572.58X3X3CRFBK

24/Seven® Open #572

Modular, anti-fatigue mats are designed to work 24/7 to keep employees comfortable. Hidden interlocking system works as a single workstation mat or to cover large areas. Drainage surface allows fluids and debris to freely flow through, preventing pooling of liquids. Available in (3) compounds: grease-resistant for all-purpose use, nitrile compound for exposure to petroleum based/industrial fluids, and CFR formulation for areas with mineral oil base cutting fluids and solvents. Available with optional safety borders. Overall thickness is 5/8".

Lock****Zenex™ Thermoplastic Safety Padlocks**

Designed exclusively for lockout/tagout applications. Features 1/4" dia. metal shackle. The Zenex thermoplastic lock body provides durability while still being lightweight. Padlock features a reserved-for-safety, key retaining cylinder to ensure padlock is not accidentally left unlocked. Each padlock has a keyed-alike or keyed-different, 6-pin cylinder to reduce risk of key duplication within key system. Cylinder features over 40,000 key changes. Includes (1) key to comply with the "one employee, one lock, one key" industry guideline. Available in red, yellow, green, blue, orange, black, teal and purple.

Lock****Non-Sparking Padlocks**

Nylon shackle helps prevent electrocution, arc flashing and electrical current from shackle to key. All components are non-sparking and non-magnetic; plastic, copper and brass. Designed exclusively for lockout/tagout applications. Durable, lightweight, non-conductive Zenex™ lock body. Key retaining ensures that padlock is not left unlocked. 1 1/2" W x 1 3/4" H Body, plastic shackle with 1 1/2" clearance.

ITEM #	MARTIN #	DESCRIPTION	UOM	PRICE
406RED	ML406RED	Non-sparking padlock, keyed-different	Ea	\$11.40
406KARED	ML406KARED	Non-sparking padlock, keyed-alike	Ea	\$11.40

BRADY**Compact Safety Padlocks**

Compact keyed-different safety padlocks have 1" shackle and comply with all OSHA requirements, in addition to being a safer alternative to metal locks for lockout applications. The body is nonconductive and the unique key cylinder prevents electricity from traveling from the shackle to the key, protecting workers when the key is inserted.

ITEM #	MARTIN #	DESCRIPTION	COLOR	UOM	PRICE

Lock****Adjustable Cable Lockout**

Integrated safety hasp and cable is easy to use and ideal for both circuit breaker panel and side-by-side gate valve lockouts. Simply feed 6" cable end through points to be locked out, and then back through lockout body. Cinch it tight to remove any slack with patented locking feature. Tough, multi-stranded 1/4" dia. steel cable is extremely flexible and insulated with a clear vinyl coating to pass through virtually all lockout points. Lightweight, dielectric Zenex™ thermoplastic body withstands chemicals and performs effectively in extreme conditions. Red color identifies the safety lockout application. Complete with high-visibility safety labels (English, French and Spanish).

Standard Lockout Tags

Lockout tags comply with OSHA lockout standard. Feature a reinforcing brass grommet with 3/8" dia. to accept most padlocks. All tag material surfaces allow for easy personalization of tags with name, department and estimated completion information as required by regulations.

Choose from two durable materials:

Heavy-Duty Polyester (B-837):

Durable polyester laminate protects graphics and holds up against water, grease and extreme temperatures. Heavy-duty construction prevents accidental removal. Withstands up to 80 lbs. pullout force. 7/16" Diameter brass grommet. 5 1/2" x 3".

Economy Polyester (B-851):

Rigid polyester surface is easy to write on and stays legible longer. Exceeds OSHA 50 lb. pullout requirement. 3/8" Diameter brass grommet. 5 3/4" x 3".

Side B: This energy source has been LOCKED OUT! Unauthorized removal of this lock/tag may result in immediate discharge.

Side F: This energy source has been LOCKED OUT! Only the individual who signed the reverse side may remove this lock/tag.

Liquid Concentrate

Great tasting, scientifically formulated electrolyte replacement drink restores important mineral salts and fluids lost through dehydration, physical exertion and heat stress. More satisfying than water or soft drinks because it is readily absorbed by the body. Mixes quickly and easily with water. Yield: 64 oz. Liquid concentrate makes 5 gal.

Chill-Its® 6603 Evaporative Cooling Band

Advanced PVA cooling technology; super-evaporative, feels significantly cooler than ambient air. Activates fast and easy: run under water for one minute and simply re-wet to reactivate. Only 1/3 the size of the Chill-Its® 6602 with the same cooling power. Use as a neck wrap by pulling end of wrap through slit. Wear for hours or for quick relief. Machine washable. Measures: 4" x 29 1/2". Blue.

Accident Prevention Safety Signs

Safety signs for the workplace are specified by OSHA 29 CFR 1910.145 and ANSI Z535 for design and application. Safety signs are to indicate potential, type and degree of the hazard that may lead to accidental injury or property damage.

MATERIALS

Adhesive Vinyl (VS): For light-duty applications. The ideal choice for indoor and sheltered outdoor marking needs. Mounts to all curved areas such as pipes, poles and secondary containers.

- 4-mil thick printed matte surface
- Permanent acrylic adhesive
- Moisture-resistant
- Service temperature range: -40° F to 176° F
- Durability: 2 years outdoors
- Square corners and scored backing for quick peel-off and application

Plastic (VP): Semi-flexible, economical and appropriate for medium-duty use - ideal for indoor and sheltered outdoor environments.

- Ideal for flat surfaces with enough flex to mount on slightly curved areas
- .055" thick with good impact resistance and surface image with non-glare finish
- Contains UV inhibitors
- Service temperature range: -90° F to 168° F
- Durability: 2 years outdoors
- Rounded corners and 3/16" mounting holes

Aluminum (VA): Get the strength of metal without the rust. Superior abrasion and chemical resistance for indoor and outdoor environments.

- Printed image on rigid .040" aluminum backing
- Protected by 2-mil high-gloss UV polyester overlaminate film
- Service temperature range: -40° F to 250° F
- Withstands splashes and washdowns
- Endures outdoor environmental conditions
- Rounded corners and 3/16" mounting holes

Accident Prevention Tags

Header style tags meet the American National Standards Institute (ANSI Z535.5) and Occupational Safety and Health Administration (OSHA 29 CFR 1910.145(f)) requirements. Choose from a variety of common styles and legends that apply to a variety of situations. Tags are available in three materials: PF-Cardstock, RP-Plastic and HS-Laminate. Measure: 5 3/4" x 3 1/4" with 3/8" hole.

Sold in packs of 25.

MATERIALS

PF-Cardstock

- Pliable, 10-mil plastic
- Pulp-free, no wood-paper content
- Waterproof and tear-resistant for light-duty use

RP-Plastic

- Hole reinforced with metal grommet
- 15-mil tear-resistant plastic
- Weather- and chemical-resistant

HS-Laminate

- 10-mil PF-Cardstock with 7-mil matte laminate on both sides
- Scratch-resistant; easy to write on
- Tear-proof, weatherproof, chemical-resistant
- Hole reinforced with metal grommet

	MATERIAL	SIZES	UOM	PRICE

Traffic and Work Zone Signs

Post traffic signs to safely direct and regulate the flow of vehicles and pedestrians in and around parking areas, dock areas, and roadways.

- Heavy-duty, .080" aluminum signs will not rust
- Reflective sign face for added visibility in low-light conditions
- UV-resistant inks prevent fading during long-term outdoor use
- Top and bottom center holes for post- or fence-mounting

MATERIALS

- **Engineer-Grade Prismatic (RA)** - Good choice for added visibility in low-light conditions. Type I.
- **High-Intensity Prismatic (HP)** - Better choice for greater visibility. 3X brighter than Engineer-Grade. Type III, IV, X.

SpillTech Oil-Only Commander™ Pads and Rolls

Naturally water-resistant (hydrophobic) pads are constructed with large-diameter meltblown poly fibers to create a lofty inner layer that absorbs high volumes of oil while repelling water. Designed for oil leaks, spills or overspray. Top and bottom layers of FineFiber are built of densely-woven, small-diameter strands to increase surface area, enabling the mat to grip surfaces securely. Sonic-bonded "dimples" add fast-wicking power and strength. Three-ply construction resists heavy foot traffic for longer wear and fewer change outs. Pads are perfed every 7 1/2" vertically. Rolls are perfed every 7 1/2" vertically and every 17" horizontally. Helps compliance with 29 CFR 1910.22(a)(2), 29 CFR 1910.107(b)(3), 29 CFR 1910.107(g)(2), 29 CFR 1910.120(j)(1), 29 CFR 1910.1450(e).

SpillTech Oil-Only Defender™ Sorbent Rolls

Layer of meltblown polypropylene creates high surface area that enables SonicBonded materials to quickly soak up oils and other petroleum products. Ultrasonic bond points fuse layers of fibers together keeping its shape. Soaks up oil while repelling water. Rolls are perfed every 7 1/2" vertically and 17" horizontally. 30" x 150'. Helps compliance with 29 CFR 1910.22(a)(2), 29 CFR 1910.107(b)(3), 29 CFR 1910.107(g)(2), 29 CFR 1910.120(j)(1), 29 CFR 1910.1450(e).

SpillTech Oil-Only Responder™ Pads and Rolls

Quickly absorbs oil for effective cleanup of petroleum-based spills on land or water. Loose stacked-weave design increases surface area on spill and starts wicking on contact to save time in critical situations. Large-diameter meltblown polypropylene fibers are left in a natural hydrophobic state that repels water and absorbs only oils and other hydrocarbons. Floats even when fully saturated. Helps to comply with 29 CFR 1910.22(a)(2), 29 CFR 1910.120(j)(1), 29 CFR 1910.1450(e), 29 CFR 1910.22(a)(2), 40 CFR 263.30(a), 40 CFR 263.31.

SpillTech

Oil-Only SockNet Sorbent Booms

Strong mesh outer sleeve encases a poly sock skin filled with highly-sorbent poly blend. Filler repels water and floats while absorbing oils and other hydrocarbons. Nylon rope and sturdy hardware ensure long-lasting durability and easy retrieval. Booms clip together with metal connector hardware to create a containment system big enough to handle most spills on water. Made with 100% post-industrial recycled filler. Absorbs 30 gallons per case. Bright white color for oil-only applications. 5" x 10'. Helps compliance with 33 CFR 154.1047(c)(2), 40 CFR 112.7(c)(1), 40 CFR 122.26 and 40 CFR 263.31.

SPC® Oil Absorbents

Convenient and cost-effective, oil sorbents will not absorb water: will float indefinitely, are wringable, dustless, unaffected by temperature, flame-resistant and impervious to both rot and mildew. Pads are dimpled and perforated. Rolls are impact bonded. Pillows and booms are lint-free. Product is also incinerable and leaves only .02% ash. Made in USA.

Industrial Absorbent Socks

Ideal for absorbing leaks and spills around machines, as well as helping to keep a facility in compliance. Absorbent socks provide great flexibility to bend or wrap the sock around equipment to catch leaks in tight spaces.

GPS3144-10

- White oil-only socks absorb hydrocarbon-based fluids and repel water. Great for outdoor applications. Also used near entrance ways to keep rain out.
- Gray universal socks absorb general fluids, such as oil, water, cutting fluids, glycols, etc. Used to line and protect walkways, drains, and entrances.
- Yellow hazmat socks are used in laboratory-type environments, or in spill kits, for emergency spill situations involving hazardous/aggressive chemicals such as acids.

SpunBond FineFiber and Camo Sorbents

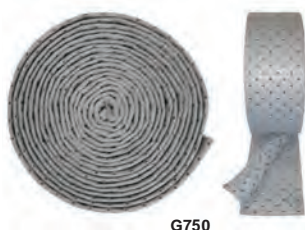

Industrial camouflage mats are great for hiding fluid stains and foot prints. Hi-viz orange infused into the camo pattern allows better visibility even in low light conditions, further preventing slips, trips, and falls. Stiff, durable, camouflage side faces up, and soft, tacky, fine fiber side goes down. Perforated for ease of use.

CONTROLLING TERMS AND CONDITIONS

All purchases and sales of products (the "Products") and services (the "Services") between Buyer and Martin Inc. (or any affiliate thereof, "Martin Inc.") shall be made pursuant to and on the price terms indicated in Martin Inc.'s quote and/or order acknowledgment and shall be governed by these Terms and Conditions. These Terms and Conditions and Martin Inc.'s quote and/or order acknowledgment shall constitute the entire agreement between the parties pertaining to the subject matter hereof, and shall supersede all prior or contemporaneous oral or written negotiations, agreements, understanding or representations with respect thereto. These Terms and Conditions shall supersede any conflicting provision contained in any purchase order of Buyer. Unless otherwise agreed in writing, nothing contained in any purchase order of Buyer shall in any way modify or add any provision to these Terms and Conditions. These Terms and Conditions may not be amended or any provision hereof waived in any way except by an instrument in writing signed by both parties. If Martin Inc.'s quote is deemed an offer, Buyer agrees that its acceptance of such offer is expressly limited to provisions contained solely in these Terms and Conditions. Buyer's issuance of a purchase order shall solely be deemed to be an acceptance of these Terms and Conditions. If Martin Inc.'s order acknowledgment is deemed to be an acceptance of Buyer's purchase order, Martin Inc.'s acceptance of such purchase order is expressly made conditional on Buyer's assent to any additional and different terms contained herein, and failure by Buyer to specifically object to these Terms and Conditions in writing within twenty (20) days of receipt shall constitute an acceptance of these Terms and Conditions.

PRICES

Prices displayed in all printed catalogs or printed promotional materials are effective as of the date of the publication and are subject to change without notification. Prices shown are for product only and do not contain any shipping, handling, sales tax, or other applicable charges. Once an order is accepted by Martin Inc., any cancellation of the order requires Martin Inc. authorization and may be subject to cancellation charges.

SALES TAX

Buyer shall pay, where applicable, any and all such charges, assessments, levies, taxes, value added taxes or other governmental charges of any nature whatsoever now or hereafter imposed by or under the authority of any law, rule or regulation with respect to the Products and Services sold or with respect to the ownership, manufacture, importation, transportation, installation, purchase, sale or use of the Products or Services related thereto, except for income taxes owed by the Seller. For clarity, all prices are exclusive of any of the items set forth in the immediately preceding sentence. In the event Customer provides to Martin Inc. a valid sales tax exemption certificate prior to order acceptance, Martin Inc. may elect not to collect tax with respect to such order; when placing an order a customer shall indicate any and all items that are tax exempt.

SHIPPING

All products are shipped F.O.B. shipping point with the cost of the shipping and handling paid by Martin Inc. and charged to Buyer. Delivery time is not of the essence. Delivery is accomplished when Products are released to the shipping agent. Shipment schedules indicated in Seller's quote and/or order acknowledgment are approximate, and Seller will use commercially reasonable efforts to deliver on the date specified or within a commercially reasonable period thereafter. Seller does not accept liability for any loss arising from delay in delivery. Buyer assumes all responsibility for risk of loss or damage to the Products upon the Products being made available to Buyer's freight agent at Seller's designated manufacturing facility.

PAYMENT TERMS

Seller shall not be obligated to ship any Products or provide any Services unless Buyer has paid in full all prior invoices in accordance with the terms of payment. For purposes of payment, each order and shipment shall be considered a separate contract and Buyer shall not be entitled to set-off against payments owing any amounts owing or alleged to be owing from Seller to Buyer for adjustments, set-offs or claims hereunder. Martin Inc. accepts cash, money orders, Visa, American Express and MasterCard. No cash discounts are allowed for early payment. For customers with established Martin Inc. credit, payment terms are net 30 days from date of invoice.

If Buyer's credit standing or financial condition becomes unsatisfactory to Seller in its sole discretion, or if Buyer breaches this agreement, Seller reserves the right to (a) require advance payments and/or C.O.D. terms, or (b) withhold shipments of Products or provision of Services in whole or in part, (c) recall goods in transit. Buyer agrees to pay (a) interest on the unpaid portion of any past due invoices at the rate of one and one half (1.5%) percent per month, or the legal maximum allowed interest rate, if less, and (b) all reasonable and necessary costs and expenses incurred by Seller in collecting any amounts due and owing, including but not limited to reasonable attorney's fees and all litigation expenses.

PRODUCT RETURNS

Buyer shall inspect and examine all Products upon delivery thereof, and such Products shall be deemed accepted by Buyer unless Seller receives a written notice specifically describing the purported defect or nonconformity within fifteen (15) days of delivery. Failure to provide such written notice within such time period shall be deemed an unqualified acceptance and waiver of any rights to return the Products. Contact your Martin Inc. representative for instructions relating to product returns or other claims. Returns require a Martin Inc. return goods authorization ("RGA"). Proof of purchase will be required. Returns may be subject to a restocking fee. All requests for an RGA or any other claims relating to material shipped must be made within 30 days from the date of product shipment.

Seller shall have the right to cancel or terminate any unfulfilled order or any part thereof in the event Buyer (a) threatens or files a petition for voluntary bankruptcy, (b) is threatened with or has filed against it a petition for involuntary bankruptcy, (c) has appointed on its behalf a receiver or trustee, (d) executes an assignment for the benefits of creditors, or (e) otherwise breaches these Terms and Conditions.

For standard, stock items, Buyer may terminate without charge any unfulfilled order at its convenience by written notice to Seller received and processed by Seller prior to shipment. For all other items, Buyer may terminate any unfulfilled order at its convenience by written notice to Seller received and processed by Seller prior to shipment, but Buyer agrees to pay a restocking fee equal to the greater of twenty five percent (25%) of the Product purchase price or Seller's costs and expenses (whether direct or indirect, general or administrative) incurred in performing and preparing to perform this agreement, and terminating the same, up to the full purchase price (e.g., if Seller is unable to return the Product to the manufacturer). If the restocking fee remains due and owing more than thirty (30) days after Seller's notification of the same, Buyer agrees to pay, all costs and expenses of collection, including but not limited to, reasonable attorney's fees. If requested, Seller will inform Buyer whether an order contains standard, stock items only.

INDEMNIFICATION

The customer agrees to defend, indemnify and hold harmless Martin Inc. and its affiliates from and against any and all claims or costs, including attorney's fees arising from or related to the customer's use of any products contained herein.

DISCLAIMER AND LIMITATION OF LIABILITY

All products contained herein have been manufactured by an unrelated third party and as such are sold by Martin Inc. "as is". Martin Inc. DISCLAIMS ALL WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND FITNESS OF USE FOR A PARTICULAR PURPOSE. Martin Inc. SHALL NOT BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, PUNITIVE OR CONSEQUENTIAL DAMAGES INCURRED BY THE CUSTOMER OR A THIRD PARTY ARISING OUT OF THE PURCHASE OF THESE PRODUCTS. Martin Inc.'S LIABILITY IN ALL SUCH CIRCUMSTANCES SHALL NOT EXCEED THE PURCHASE PRICE PAID FOR THE AFFECTED PRODUCTS IRRESPECTIVE OF THE NATURE OF THE CLAIM.

MANUFACTURER'S WARRANTY

Please contact your Martin Inc. representative with any questions relating to manufacturers' product warranties.

Safety Support & Expertise that you can count on!

Are you OSHA ready?

With the ever changing needs of your company's safety compliance and OSHA laws/standards changes, Martin is ready with the right products and expertise to provide the right solution for your Safety needs.

Safety Specialists

Martin Safety Specialists are educated and field-trained to respond to our Customers' specific needs.

- ▶ On-Site surveys
- ▶ Product analysis
- ▶ Hazard assessment
- ▶ Inventory control
- ▶ Technical support
- ▶ New product introductions
- ▶ Cost-saving initiatives

Strategic Account Team

This highly specialized team of individuals is capable and committed to providing exceptional safety procurement solutions. In addition to providing national resources for strategic account implementation, this team also coordinates pricing consistency, performance requirements and progress reporting, as well as continuously monitoring activities to assure all commitments are fulfilled.

Customer Service

Martin has Safety Representatives dedicated to the support of our sales force and the needs of our Customers. Our Customer Service Representatives attend monthly product training seminars to continuously increase product knowledge and keep current with the newest safety products available in the marketplace.

Technical Support

Designed to support customer service and the sales force when additional technical information is required, these highly experienced individuals work closely with our strategic supplier partners to keep current with the latest technology and product innovation.

Global Reach...

...but small enough to care!
