

BOX CUTTER SAFETY 101

1 pay attention to sharp new blades and protect yourself

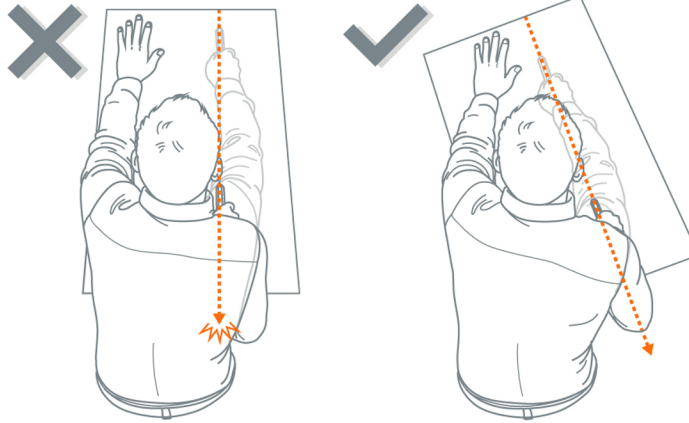

over 1,000,000 U.S. hospital visits per year are due to hand injuries from dangerous blades¹

2 expose only enough blade to cut your material

using more blade than necessary leads to injuries and damaged merchandise

3 ignore distractions and cut deliberately and at an angle away from your body

4 retract the blade and store in a safe place when not in use

every year, hand and wrist injuries cost millions in damages in the workplace and may cause permanent damage²

why not prevent injuries in the first place?

5 take care when disposing of dangerous blades and use a sharps disposal box

Slice® safety blades don't require a sharps disposal box!

¹ U.S. Bureau of Labor Statistics (BLS) reports more than one million emergency room visits come from hand injuries each year as referenced in this article: <http://zero-excuses-protection.com/information/the-true-cost-of-hand-injuries-in-the-workplace/>

² Journal of Bone and Joint Surgery references a study: <http://ehstoday.com/health/cost-hand-and-wrist-injuries>

what cuts you:
the handle or the blade?TM
we redesigned both.
