

BLACKLINE REFRESH trade-in program

Turn the devices you have into the solutions you want. Save on a new Blackline Safety G7 or G7 EXO when you trade in a competitive brand of personal gas detector or area monitor.

The Refresh Program is designed to allow you to upgrade your existing gas detection fleet to the latest technology from Blackline Safety.

» Our PROMISE

When an incident occurs, the clock starts — and it doesn't stop until help arrives. What happens in between is in your hands. If an employee falls from a ladder, dangerous weather is approaching, or an explosion or gas leak has occurred, each passing minute without action could mean a worker not going home to their family.

G7 gives you the chance to control time. Our cloud-hosted monitoring platform displays the whereabouts and well-being of team members in the field — easily identify if someone has encountered a potential hazard, along with all environmental data collected by their device, for empowered emergency responses.

A leading gas detection program begins with leading and reliable gas sensor technology. Compatible with over 20 high-quality gas sensors, including the groundbreaking MPS-LEL, you can rest easy knowing you can deliver your team to safety and account for every single employee along the way. No one is left behind.

» Meet THE FAMILY

G7c or G7x Standard lone worker monitor

G7c or G7x Single-gas personal gas detector

G7c or G7x Multi-gas personal gas detector

G7 EXO area gas monitor

» Four types of devices MULTIPLE WAYS TO SAVE

Trade in when you buy Blackline Safety solutions, and we'll apply a rebate towards your purchase – a better way to part with your aging gas detection fleet.
