

PELTOR™
Protection & Communication

The hearing protection you need. The savings you want.

**Trade-in or trade-up to get
a rebate on 3M™ PELTOR™
X Series Earmuffs.**

Now's the time to upgrade to the lightweight comfort of 3M™ PELTOR™ X Series Earmuffs. Trade in your current hearing protection and get a rebate on the versatile low profile earmuffs your crew will appreciate. X Series Earmuffs provide moderate to very high levels of attenuation, including the highest NRR* earmuff available, to fit a wide range of industrial applications.

If you already use 3M Hearing Protection, you can trade-up to get a rebate when you upgrade to X Series Earmuffs.

Assess your hearing protection today—offer ends December 31, 2022—and make the switch to 3M™ PELTOR™ X Series Earmuffs.

Trade-in or trade-up

Offer ends December 31, 2022

It's easy to get started.

- 1 Identify:** Find the earmuff products you want to trade in or trade up.
- 2 Choose:** Select eligible 3M™ PELTOR™ X Series Earmuffs at go.3M.com/xseriestradein
- 3 Order:** Contact your 3M authorized distributor to place your order.
- 4 Register:** Confirm your purchases and initiate your rebate payment at go.3M.com/xseriestradein

Trade-in or trade-up at go.3M.com/xseriestradein today.

What you'll need:

- Digital copy of your receipt of purchase from a 3M authorized distributor
- Digital images proving your old equipment was taken out of service

End-user rebate only. Distributors and wholesalers excluded. Must follow requirements online to receive rebate. Visit go.3M.com/xseriestradein for full terms and conditions. Void where prohibited.

*U.S. EPA specifies the NRR as the measure of hearing protector noise reduction. However, 3M makes no warranties as to the suitability of the NRR for this purpose. 3M strongly recommends personal fit testing of hearing protectors. Research suggests that users may receive less noise reduction than indicated by the attenuation label value(s) on the packaging due to variation in fit, fitting skill, and motivation of the user. Refer to applicable regulations for guidance on how to adjust attenuation label values. It is recommended that the NRR be reduced by 50% to better estimate typical workplace protection.
