

# HOW ERGODYNE'S LADDER CARRYING SYSTEM CAN GIVE YOUR CREWS A LIFT

## PROBLEM: LOADING & UNLOADING LADDERS

Causing sprains and strains, damage to ladders and other equipment

## SOLUTION: CARRY HANDLE

Rubberized top grab handle for leverage and control while loading and unloading ladders.

## PROBLEM: LONG WALKS TO & FROM JOB SITE

Difficult to transport without causing damage to worker, the ladder, property and others; not able to use hands for opening doors and other tasks

## SOLUTION: PADDED SHOULDER STRAP

Comfortable, controlled and balanced carry that frees up hands to hold other items or open doors etc.

## PROBLEM: LADDER RAILS SEPARATING DURING TRANSPORT

Causing pinched fingers, damage to ladder, property and more.

## HOOK AND LOOP RAIL STRAP

Secures around outer rails to keep ladder closed during transport.

## LADDER SHOULDER LIFTING STRAP & CARRYING HANDLE

The Arsenal® 5300 Ladder Shoulder Lifting Strap & Carrying Handle System is designed to assist in the carrying and overall safety of transporting a ladder. System consists of a padded pocket, 3 hook & loop straps and an optional shoulder strap.

To hold up to the weight of heavy bulky ladders, it is made with durable weather-resistant webbing and secure stitching that is resistant to tears, abrasions and punctures. The size and shape is compatible with a variety of ladder types, including fiberglass, wood and aluminum ladders with varying rungs, cross bars or gussets.

A removable padded shoulder strap and rubberized top grab handle provides comfort and offers better control when transporting in cramped spaces. The shoulder strap allows the carrier to put a majority of the ladder's weight on the shoulder, helping to relieve stress from the arms, hands and back.

Intended to remain conveniently on the back of the ladder when in use, there is no need to install and remove the system upon each transport. When the ladder is upright in use, the padded shoulder strap can be placed into the main pad pocket to prevent snags, trips and falls.

Ideal for workers regularly lifting and transporting heavy ladders, including construction, carpentry, automotive, electrical and more. Also great for weekend hobbyists and DIY projects.

### Features

- **MULTIPLE WAYS TO TRANSPORT** – Easily carry heavy ladders using the top grab handle or adjustable shoulder strap
- **NO UNINSTALL NECESSARY** – System is designed to remain on ladder while in use
- **LADDER COMPATIBILITY** – Fits fiberglass, wood and aluminum a-frame or straight ladders with varying rungs, cross bars or gussets
- **WASHABLE** – Hand wash, air dry

Scan for video on proper install and use

- 1 **EASY INSTALLATION** – Hook & loop straps securely attach to both rails to keep ladder safely closed when transporting
- 2 **PADDED POCKET** – Provides a cushion when resting against the hip and holds excess straps when ladder is in use
- 3 **DURABLE** – Weather-resistant webbing and secure stitching for transporting heavy loads
- 4 **ADJUSTABLE SHOULDER STRAP** – Padded shoulder strap for comfort
- 5 **CARRYING HANDLE** – Rubberized top grab handle for quick transport
