DIFFERENCE®

Choose SW For A Sustainable World

Our Mission

SW® is on a mission to lead the personal hand protection industry with sustainable solutions and innovation. Biodegradability is just one aspect of sustainability, our efforts are focused on multiple factors to make our product and processes eco-friendly. We make sustainable technologies designed to allow products to last without decreasing performance.

HAPPY EARTH DAY

Sustainable Awards

*In a Landfill in 2.5 Years.

GreenCircle Certified

2022 Ragan's CSR & Diversity
Awards Finalist in Green and
Environmental Stewardship
Category

2022 Best In Biz Silver Winner
in Most Environmentally
Friendly Product of the Year

2022 Environmental
Protection Winner in Green
Technology and Sustainable
Safety/Health Products

DIFFERENCE®**

EcoTek®

Introducing SW® EcoTek® Biodegradability Technology

EcoTek is a nitrile treatment that accelerates the break-down in landfills without performance loss.

EcoTek gloves biodegrade in landfill, 92.6% in 2.5 years tested according to ASTM D5526-12.

What happens to nitrile gloves in landfills after 2.5 years?

Regular Nitrile Gloves

Without oxygen, moisture and temperature, biodegradation slows down. Regular gloves will be stuck in landfill for centuries.

100+ Years to Degrade

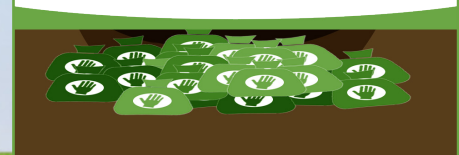

VS.

EcoTek Nitrile Gloves

92.6% of the EcoTek gloves break down and the remains become organic, non-toxic materials. Preventing waste pile up and environment pollution.

Waste Reduction

1 million tons of waste is reduced to 74,000 tons!

*Under test method ASTM D5526-12, a standard test method for determining anaerobic biodegradation of plastics in accelerated landfill conditions. Current biodegradation results do not predict future results.
