

Plastic Parking Stops

Rubber Parking Stops

Rubber Corner Guards

Plastic Speed Bumps

Rubber Speed Bumps

Rubber Wall Guards

- **Lower Total Cost of Ownership:** Lower cost of installation/replacement vs. traditional asphalt/concrete.
- **Recycled Materials:** Manufactured from 100% recycled rubber or high-density polyethylene.
- **Safe Operations:** Improves safety by reducing the risk of accidents in car parks, garages, and alleyways.
- **Flexible:** Easy to install and can be removed to prevent plow damage during winter months.
- **Configurable Options:** Multiple colors available; modular sizes allow configuration for any space.

Start with the Essential...

In 2018, Checkers™ became a portfolio company of Justrite Safety Group®

For more than a century, Justrite has kept workers safe. We're trusted experts dedicated to protecting where the world works, ensuring every customer achieves compliance to regulations, and follows best practices for a safe and productive workplace.

Justrite Safety Group is a growing family of leading industrial safety companies. We are united by deep safety knowledge, long experience, and a commitment to protecting people, property and the planet.

General Purpose Cable Protectors
Up to 43,000lbs/Axle Capacity

Modular Cable Protector Systems
Up to 35,600lbs/Axle Capacity

ADA Compliant Solutions
Up to 40,300lbs/Axle Capacity

Ground Protection Matting
Up to 120T Capacity

Outrigger Crane Pads
Up to 70T Capacity

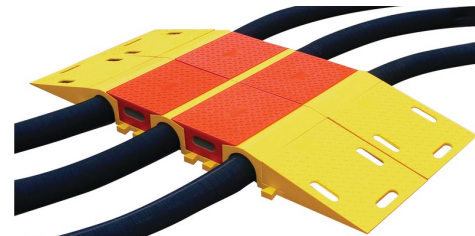

GeoGrid Cellular Paving System
Up to 25T point Load

Drop-Over Cable Protectors
Up to 23,400lb/Axle Capacity

Extreme Crossover Systems
Up to 400,000lbs/Axle Capacity

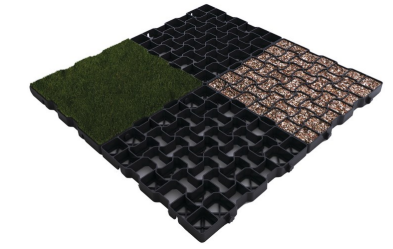

Hose Bridge Systems
Up to 23,700lbs/Axle Capacity

Ground Protection Matting
Up to 120T Capacity

Outrigger Crane Pads
Up to 70T Capacity

GeoGrid Cellular Paving System
Up to 25T point Load

- **Improved Productivity:** Checkers interlocking system simplifies setup, dismantling, and storage.
- **Universal Design:** Multiple channel options, system types, and a modular & expandable design.
- **Lower Total Cost of Ownership:** Superior polyurethane manufacturing provides extended life over rubber and metal cable protectors even in extreme conditions. Lighter weight also leads to lower shipping costs.
- **Safe Handling:** Lighter and easier to handle than rubber or metal cable alternatives, decreasing risk of injury.
- **Durable:** Resistant to extreme wear, chemicals, and weather; suitable for both indoor and outdoor use.

- **Versatile Solutions:** Roadways, walkways, working platforms, parking, landing pads; essential for harsh environments and sensitive sites.
- **Improve Productivity:** Easy to deploy by hand; mats & GeoGrids interconnect to form secure tracks/platforms.
- **Safe Operation:** Provide safe access and stable work areas on soft ground or with heavy equipment.
- **Loss Prevention:** Prevent property/equipment damage & productivity loss from ground subsidence or surface damage.

Mining and All-Terrain Chocks
GVOW: Up to 1,600,000lbs
Tire Diameter: Up to 165"

Utility Chocks
GVOW: Up to 245,000lbs
Tire Diameter: Up to 65"

Aviation Chocks
Mil-Spec M 32058-1-2-A available
For light sport up to wide-body A/C

Light-Duty Warning Whips
Enhances vehicle & equipment visibility in all-terrain conditions.

General-Purpose Warning Whips
Customizable options for increased visibility in low-light operations.

Heavy-Duty Warning Whips
Most robust choice for use in extreme-weather conditions.

- **Safe Handling:** Lighter and easier to handle than rubber/metal wheel chocks, decreasing risk of injury.
- **Safe Operation:** Tire-friendly design reduces the risk of damage to equipment or projectile injury to personnel.
- **Loss Prevention:** High visibility in low-light reduces risk of collision/rollover, and makes chocks easier to find.
- **Lower Total Cost of Ownership:** Superior polyurethane foam and elastomer is more durable and resistant to extreme wear, chemicals, and weather, reducing frequency of replacement by up to 5x.
- **Compliance:** Meet or exceed MSHA, OSHA, SAE, NFPA, DOT and IATA standards/guidelines.
- **Configurable Solution:** Mounting & storage accessories, and custom logos/colors are available.

- **Loss Prevention:** Decrease risk damage or loss from collisions with heavy equipment.
- **Visual Safety:** Prevent injuries through enhanced day and low-light visibility of vehicles and assets.
- **Lower Total Cost of Ownership:** Tapered fiberglass rods decreases replacement frequency.
- **Extensive Options:** Configuration options color of flag, LED colors, length, and connections.
- **Versatile Solutions:** Variety of accessory options to configure to your specific task and vehicle.
