

# WHAT DID STAND-DOWN WEEK REVEAL ABOUT YOUR SAFETY PROGRAM?

OSHA's National Safety Stand-Down creates an opportunity for teams to pause, evaluate risks, and reinforce safety work practices.

For many facilities, these conversations also reveal opportunities to improve training, PPE inspections, rescue planning, and more.

Martin's safety experts can help your team identify those opportunities and support continuous improvement across your program.

## SAFETY CONVERSATIONS WORTH CONTINUING

- 1 Did Stand-Down Week reveal fall protection gaps?** Training consistency, equipment condition, rescue planning, and PPE compliance issues often surface during safety reviews.
- 2 Are authorized users properly trained and equipped?** Proper training, equipment selection, and consistent practices can help improve safety performance and support compliance.
- 3 Were additional workplace hazards identified?** Many facilities also uncover concerns involving heat stress, hand protection, visibility, ladder safety, and PPE usage.
- 4 Would an outside safety assessment strengthen your program?** A fresh perspective can help identify risks, improve consistency, and reinforce safe work practices across your facility.
